Karen Laboratory

Patient	JOSEPH KURIA	Lab No	KLN-87874	Registered On	19-Apr-2021 12:26:PM
Age	61 Years	Doctor		Collected On	20-Apr-2021
Sex	M	Account	FOC HOSPITALS	Reported On	20-Apr-2021 9:35:AM
Acc No	ACC00000025	Area		File No	

Laboratory Report

TESTS	RESULTS	NORMAL/MEASURE RANGE	SPECIMEN
<u>MTB-RIF ASSAY</u>			

MTB- RIF ASSAY MTB NOT DETECTED

LAB INTERPRETATION

1. For negative test; No MTB detected 2. For Positive Test ; MTB DETECTED either Very low, Low, Medium or High If MTB was Detected, the results will also state whether Resistance to RIF was Detected: Mycobacteria have a high probability of resistance to RIF; another sample should be collected and sent to Reference Laboratory for Culture. Not detected: Mycobacteria are probably susceptible to RIF. Indeterminate: the test could not accurately determine if the bacteria are resistant to RIF. Recommended to collect another sample for Re-testing.
